

16 Reasons Why You Can Trust Tyent Water Ionizer Products - Part One

Tyent Water Ionizer sums up all the advanced and groundbreaking features to provide a user-friendly experience together with healthy water for your family. Safety and purity are at the forefront of every Tyent UCE-13 Plus and new ACE-13 water ionizer we produce and will not just change the standard benchmark for the water ionizers industry but will transform the way you look and feel on the inside and outside. Tyent Australia has the highest strict standards for quality, safety, and durability by skillfully designing it as a chemical-free water ionizer that suits perfectly to your water needs.

By choosing Tyent Water, you can trust it as your source for healthy, great-tasting water, you are sure that you don't miss any health benefits your body needs such as the molecular hydrogen H₂ that helps improve your overall health. The following features will help you understand how Tyent Water Ionizer provides ultimate convenience to your everyday life.

8 GROUND BREAKING FEATURES OF TYENT WATER IONIZER

- 1 Aesthetically compliments your kitchen area
- 2 Customizable design display
- 3 Fixed quantity discharge function
- 4 Proximity sensor function for automatic water outflow
- 5 Eco mode setting
- 6 Smart automatic cleaning
- 7 Easy to manage front-load filters
- 8 High-quality components

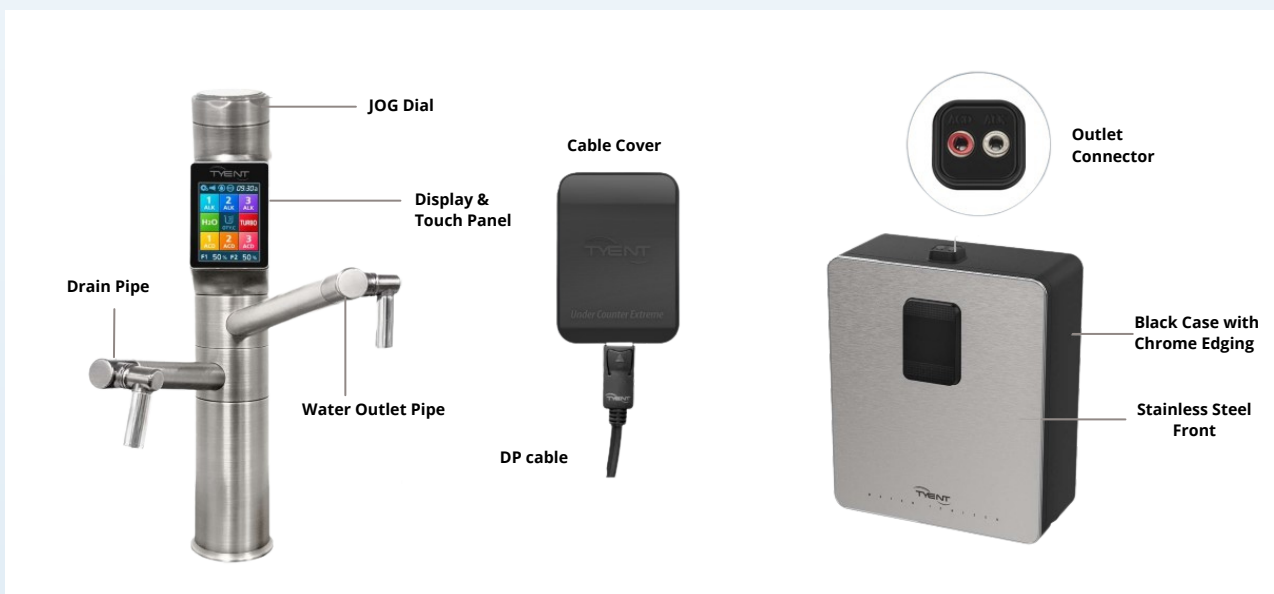

1. AESTHETICALLY COMPLIMENTS YOUR KITCHEN AREA

The simple yet modern and sleek casing of the Tyent Water Ionizer will compliment your kitchen's decoration with a neat and luxurious expression. The stainless steel design makes Tyent machines easier to clean and maintain.

2. HIGH-QUALITY COMPONENTS

Tyent Water Ionizer components are skillfully designed with quality material for your safety and convenience.

3. CUSTOMIZABLE DESIGN DISPLAY

You can now add a little personality to your new Tyent Water Ionizer by choosing full color or night mode displays. It perfectly suits your water ionizer machine and your kitchen style.

4. FIXED QUANTITY DISCHARGE FUNCTION

Customize to fill your favorite glass or container perfectly with a single touch!

The diagram illustrates the fixed quantity discharge function. It shows a sequence of buttons: a glass icon, '0.5', '1.0', '1.5', and another glass icon. Below this, a 'JOG DIAL' is shown with a range from '0.2' to '5.0'. Text explains: 'Turn Jog Dial Clockwise (Increase 100ml: max 5L)' and 'Turn Jog Dial Counterclockwise (Decrease 100ml: Min 0.2L)'. A close-up of the jog dial is also shown with the text 'PUSH Over' and '4750 RPM'.

You might have your favorite drinking bottle or pitcher that you usually use at home—that's why Tyent Water Ionizer has considered having this feature for your convenience to fill your glass or bottle at your desired level quickly. Presets include 0.5L, 1.0L & 1.5L, or you can simply use the jog dial to fine-tune by 0.1L, 2L, and up to 5 liters.

5. HANDS-FREE PROXIMITY SENSOR

Tyent is proud to introduce the industry's first and only fully programmable, motion activated flow sensor. Now you can have your most frequently used water choices dispersed easily and conveniently with the wave of your hand.

6. ECO MODE SETTING

ECO MODE SETTING

Save energy by enabling Eco Mode on your ionizer to only display the current time after non-use!

- Enable ECO Mode after 1 minute
- Enable ECO Mode after 5 minutes
- Enable ECO Mode after 10 minutes
- Disable ECO Mode

When you turn the eco mode on, the unit consumes less power by going to sleep mode when not in use and display the time instead. Also, you can set the time of the period before it goes to sleep mode.

7. SMART AUTOMATIC CLEANING

CUSTOM CLEAN AUTOMATIC DESCALING

Set your ionizer to automatically clean when it's convenient for you. Select between quantity usage or time of the day!

- When source water hardness is high and/or if you are frequently drinking level 3 Alkaline.
- When Acidic and Alkaline levels are used in proper ratio.
- If you want automatic cleaning to occur once a day at a desired time.

The automatic cleaning feature maintains your unit, so you don't have to worry about cleaning the inside. You can choose to have the automatic cleaning occur after a predetermined volume of water is poured, or you can choose to have the cleaning cycle run at a certain time of the day.

8. EASY TO MANAGE FRONT-LOAD FILTERS

EASY TO MANAGE FRONT-LOAD FILTERS

Open and close type door & simple filter replacement system

Dual .01 Micron Dialpure Filters

Same filtration levels as used in kidney dialysis!

As you know, to replace filters in the old water ionizers, normally you turn clockwise and counter clockwise to fit a new one. Tyent now introduces the all new UCE Plus and ACE Ionizers with the most accessible replacement system by just pushing and rotating the filter to remove and replace it and consumes less than half the time the traditional way.
